

**SPECIFICATION AMENDMENTS:**

Please replace paragraph [0019] with the following amended paragraph:

[0019] It is preferable that the first antenna element and the third antenna element are formed in an electrical length so as to resonate at the same frequency band and the phases of two are adjusted so as to ~~strengthen~~ that radio waves transmitted and received by the first antenna element and the third antenna element strengthen each other. By making this structure, when a portable telephone is used for a cellular communication and a digital TV, for example, a cellular communication can be transmitted and received with an increased sensitivity by switching off a digital TV.
